Dodgers

The cockpit of a yacht can be quite exposed to the elements; consequently sitting out in the cockpit during these times is normally an uncomfortable experience. The guardrail area on either side of the vessel adjacent to the cockpit, is perfectly situated for panels to be attached to, therefore offering some side protection from the wind and spray and enhancing your comfort in the cockpit.

Dodgers are generally made from UV stable acrylic canvas and available in a wide range of colours to complement your existing canvas-work. Nickel plated eyelets are installed and ample lashing cord or cable ties are supplied for tensioning to the guardrails and stanchions. Alternative methods of attachment are available if required upon request.

Dodgers are also an ideal location for your vessels name or sail number to be advertised. For an optional extra nominal charge, PVC lettering and numbers can be added to the Dodgers. Our lettering is sewn on to the Dodgers and is available in a wide range of colours, font types and styles. Furthermore, where possible, we can also add to your Dodgers; cut outs for cleats, winches or blocks. We can even add convenient storage pockets for furling lines and those small valuable items such as a hand held GPS or mobile phone.

A separate Dodger can also be manufactured that fits around the back of the pushpit rail. When a Pushpit Dodger is used in conjunction with side Dodgers on an aft cockpit yacht, the pushpit area of the cockpit, up to the aft most vertical stanchion, is protected; thus offering increased shelter in the cockpit. The availability of a Pushpit Dodger will vary, depending on the design of the pushpit and the location of your vessel.

In the unlikely event that we do not have the side Dodger dimensions on file for you vessel, a self measurement form and measuring guide is available on our website, or alternatively from our office.

As with all manufactured products the **C&J Dodgers** are guaranteed for 12 months against defective workmanship and/or materials.
