Cockpit Enclosure

Without doubt the cockpit is one of the most important and busiest areas on board any yacht. It is a space approximately one third the length of your yacht that, up to now, may not have been used to its full potential. Having identified this, C&J Marine have developed a Cockpit Enclosure that will utilise this area more efficiently.

The C&J Cockpit Enclosure will protect you, your crew and your cockpit. It will also extend the living and useable area on board, whilst adding to the appearance of your yacht. Therefore, not only will the Cockpit Enclosure provide protection to the cockpit from bad weather conditions, the extra space gained by adding the enclosure can now be maximised in other ways.

For example, it will provide extra accommodation, space to hang your wet weather clothing or even a room in which to socialise with your family or friends. You could even say that the Cockpit Enclosure is the marine equivalent to adding a conservatory to your home!

The C&J Cockpit Enclosure is designed to attach, using heavy duty zips, to your existing or new C&J Sprayhood. The cover then extends aft, supported by framework, down to the rear of your cockpit.

Also incorporated in the C&J design are three zipped panels which can be used not only for access, but can be easily opened and rolled up should airflow be required in the cockpit. The design and the manufacturing process of the C&J Cockpit Enclosure are constantly being updated and the materials and equipment used are of the best quality available. These materials, in conjunction with our manufacturing techniques enable us to provide a product of a consistently high quality.

Further details of the design and specification of the C&J Cockpit Enclosure are provided overleaf along with optional extras that are available with this product.

Cockpit Enclosure (cont)

The C&J Cockpit Enclosure is manufactured using a UV stable and shower resistant acrylic canvas. This acrylic canvas is available in a wide range of colours and should therefore make your choice to match existing canvas work, or co-ordinate with your yacht's colour scheme, an easy one!

The marine grade stainless steel frame is split and jointed, using spring loaded pins, once in the top centre of each bar as standard. If confined storage is required extra splits and joints, just below the radius corners, can be offered as an optional extra.

C&J provide an innovative colour coding system that assists with the storing and, when required, erecting of the framework, therefore making handling easier.

The acrylic canvas cover is attached to each bar of the framework by means of a heavy duty nylon zip incorporated in to a canvas pocket.

The C&J Cockpit Enclosure also comes complete with three windows as standard - one in the port side, one in the starboard side and one aft, each incorporated in to a zipped access panel. These panels can be rolled up and secured in placed with webbing tie up straps.

As with the Cockpit Enclosure itself, the access panels, once zipped closed, attach to the outside of the cockpit coaming. This is performed by using top quality, simple to use, fasteners. This method of fastening provides a water resistant seal between the enclosure and the coaming.

As an optional extra the C&J Cockpit Enclosure frame storage bag enables the frame to be kept together, protected and easily found when placed in to a locker. The bag will also protect other equipment within the locker.

An acrylic canvas Cockpit Enclosure cover storage bag is also available and comes complete with strong webbing handles. This bag too will keep your C&J Cockpit Enclosure cover protected and compact when stored away.

If more light and/or vision is required in the cockpit, extra windows in the side and aft panels of your Cockpit Enclosure are available as a further optional extra. Window blinds can also be added to the interior of the windows providing more privacy.

Furthermore, exterior covers will provide protection to the windows from UV light and other abrasives. These are also available for a further minor cost.

The C&J Cockpit Enclosure is supplied complete with all necessary fastenings, step-by-step installation guide and a 12 month warranty against defective workmanship and/or materials.
